

**Are you interested in giving a music therapy workshop at World Psychiatric Association (WPA) conference in Alexandria (Egypt) together with other creative arts therapists ?**

When: 4 hours on one day between 11.4.-14.4.2025

Workshop:

After a brief introduction to all modalities of creative arts therapies, there will be practical work in art therapy, dance and movement therapy, drama therapy, music therapy and vocalization, and poetry therapy, one after the other.

Interactive exercises in arts activities will be offered in individual, dyadic and group settings. Afterwards, there will be an opportunity to give feedback and ask questions.

A music therapist is currently being sought for this workshop who can provide the music therapy training as part of this four-hour workshop.

This is a scientific meeting - so someone who is interested in fostering their academic and scientific career by publishing in the conference and maybe later on together.

There will be no coverage of hotel but we are allocating very good and very reasonable options at 27\$ bed and breakfast for early career that the creative arts therapist can benefit from - if the person is going to only attend the day of the course then no registration required - if the person is going to attend the conference then registration is required.

Travel and transportation will be the responsibility of the presenter and no honorarium but personal assistance from organizers to find best deals will be provided – like hotel.

Also some instruments could be provided upon coordination with music therapist.

If interested in Hybrid collaboration and there is no means to travel – it will be our second best.
